

Rapid Test Detecting All Quinolones And Fluoroquinolones In Milk

QuinoSensor is a rapid assay in dipstick format detecting the contamination of milk samples by (Fluoro)-quinolones molecules.

The test can be used in-situ for daily controls or in laboratories for the analysis of series of milk samples. This test does not require any sample processing, cleaning or extraction.

BENEFITS

- 
RAPID
Results in 6 minutes.
- 
SENSITIVE
Limit of detection below EU MRLs.
- 
GENERIC
Detection of all relevant (Fluoro)-Quinolones.
- 
RELIABLE AND ROBUST
- 
USER-FRIENDLY
Easily performed on site or in lab.
- 
COST-EFFECTIVE

RESULTS

Visual interpretation of the result obtained by comparing the intensity of each test line with the control (CTRL) line.

An instrumental reading is also possible with the ReadSensor device.
